PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience building production-grade web applications using **React**, **TypeScript**, and **NestJS**. Proven ability to deliver end-to-end features – from secure REST API design to responsive UI, demonstrated through a completed software engineering internship and independently deployed projects. Seeking a software engineering role to contribute to scalable, high-impact products.

EDUCATION

American International University - Bangladesh
Computer Science & Engineering (B.Sc.)
CGPA: 3.62/4.00

Dhaka, Bangladesh
Feb 2022 – Apr 2026

TECHNICAL SKILLS

Primary Stack:	JavaScript, TypeScript, React.js, Next.js, NestJS, Tailwind CSS
Other Languages:	Python, PHP, HTML/CSS
Frameworks/Tools:	Git, Linux, Bash, Figma, Vercel, Netlify, Render, SendGrid
Databases:	PostgreSQL, NeonDB, MySQL
Familiar With:	ASP.NET, Bootstrap, jQuery, REST API Design, JWT

WORK EXPERIENCE

Polygon Technology
Software Engineer Intern

Dhaka, Bangladesh
Oct 2025 – Dec 2025

- Engineered production features for scalable web applications in **JavaScript** and **TypeScript**, applying modular architecture principles that significantly improved codebase maintainability and long-term scalability
- Architected and implemented **RESTful APIs** with secure, structured data contracts between frontend and backend services, accelerating cross-team integration and reducing delivery bottlenecks
- Enforced rigorous **Git** workflows across a collaborative engineering team — managing branching strategies, participating in code reviews, and maintaining deployment pipelines — resulting in zero-defect releases throughout the internship

PROJECTS

Petal & Pearl | Live | GitHub

React (Vite), NestJS, PostgreSQL, TypeORM, Tailwind CSS

- Built a full-stack e-commerce platform using **React (Vite)** and **NestJS**, backed by **Neon PostgreSQL** and **TypeORM**, with **JWT authentication** and **role-based access control (RBAC)** supporting separate Admin and Customer dashboards
- Implemented end-to-end commerce features including **automated PDF invoice generation**, inventory and order lifecycle management, and product uploads via **Multer** — handling 20+ product categories with real-time cart synchronization
- Designed a responsive, high-contrast UI with **Tailwind CSS** and **Framer Motion** animations; deployed frontend to **Netlify** and backend to **Render** as a production-ready SPA

Sentin | Live | GitHub

Next.js, TypeScript, Tailwind CSS, React

- Engineered a zero-exfiltration productivity ecosystem running entirely in the browser sandbox, ensuring **100% offline data privacy** without relying on backend servers
- Integrated advanced client-side processing to enable complex **PDF manipulation**, rich text **.docx** exporting, and cryptographic utilities across a fully responsive, macOS-inspired interface

Online BookStore | GitHub

JavaScript, ASP.NET, Bootstrap, jQuery

- Built a **RESTful API**-driven book management system supporting browsing, searching, and purchasing workflows across a fully responsive UI
- Implemented dynamic sales tracking and **automated PDF report generation** using **jsPDF** and **QuestPDF**, enabling administrators to export order summaries on demand
